

Care of your Marimba

In order to care for your marimba appropriately, please follow the instructions below:

Please do not:

- Place anything on the instrument
- Use in-appropriate beaters including drumsticks, xylophone mallets or mallets which do not contain wool/binding around the core of the mallet.
- Play the instrument with excessive force which can result in cracked bars
- Store in areas which can experience extreme temperatures as this can affect tuning

Please:

- Only use marimba or vibraphone mallets on the marimba. Appropriate mallets can be purchased at www.nickparnell.com
- Keep cover on instrument when not in use
- Every couple of months wipe off any dust with cloth or duster (do not use cleaning agents on marimba bars)

Packaging:

You must keep any boxes and packaging that the instrument is delivered to you in. You will need these to return the instrument on completion of hire. (NOTE: If you fail to maintain the original packaging, additional costs will apply. Please refer to the Hire Terms and Conditions for further information).

Enjoy your marimba!
